News Letter

In the name of Supremo Lord of the Day of Judgement and in the name of our Savior on That Day (S.A.W.S), here was the third letter. Unless it was found out whether members were interested, it would be useless to waste time and tax the mind, it would be an exercise in futility. Some lone voices of appreciation were heard. The purpose of these letters was not to maintain a diary but just to provide some information about TMA, important news or to distract the members mind from business worries for a while so that they might relax. Some members recommended that a fortnightly letter became too long. It should have been weekly. No doubt, it was a difficult job but nothing was wrong to give a trial. So this was a weekly missile. I was really indebted to my eldest daughter Zehra Jamal who provided me some interested news from Urdu papers.

2ND MAY, 2007

Chairman TMA had gone to Lahore to visit Northern Circle TMA to streamline R&D accounts and to solve other problems. Would also go to Islamabad to attend a meeting called by Secretary Ministry of Textiles.

Reminded Mr.Mushtaq Ali Cheema, Minister for Textiles to come over to Karachi and inaugurate the new Auditorium. In reply, Minister advised to write him another letter which had been duly sent asking him for date and time.

The US hounds were still after our Hero Dr.Abdul Qadeer Khan and a Dossier of about 170 pages had been released alleging that Dr.Khan's network was active and many cooked evidences and allegations had proved the involvement of Iran, Libya, north Korea and some other countries. All humbug. Why should we Pakistanis be accused for the piracy of nuclear material. Every country had done it and every country was doing it.

Beware of global warning, warned by an environment Scientist. According to him, Indus River and other water sources will be depleted by 22% in year 2025 while the population would increase by 20 billion. Fill in your water tanks.
