Association Members,

RE : CORRECTION OF TOWEL EXPORT FIGURES

Dear Members,

Please furnish this Association your export figures of Towel and made-ups separately for the period from July, 2009 to January, 2010 on the following format latest by March 15, 2010:

July, 2009 – January, 2010 {7 months}

Quantity in kilogram

Value in US\$

We require above information to reconcile with the figures of export of Towel for the period from July, 2009 to January, 2010 released by Trade Development Authority of Pakistan since figures for Towel exports seem to be on very high side and the value is very low which, in our opinion, are incorrect.

In order to make our case effectively and strongly to the concerned authorities, we need above information which would help us to refute the claim of TDAP in connection with export of Towels.

Thanks with regards,

SAMAD KHALIL
Secretary General

Towel value added sector

Aptma demands minimum export price condition

KARACHI: All Pakistan Textile Mills Association (Aptna) has urged the government to set minimum export price condition for the towel value added sector.

As per SRO (I)/2010 dated 26th February 2010 the minimum export price for Value Added Yarns, which can be exported without any quota, restriction has been placed at \$ 3.5 per kg. Whereas on the other hand, the average export price of the towel sector as reported on the FBS website for the months of October, November, December and January is \$ 3.0 per kg, but these items are considered value additions and can be exported without any quantity restriction as well as are entitled to other benefits such as export refinance, etc.

M. Yasin Siddik, Chairman Aptna (SB Region) asked why such unnecessary restriction and conditions are being imposed on the spinning sector. Another point to be noted in SRO is that even though the minimum export price of \$ 3.5 per kg has been imposed, Yarn producing units are still required to go through a separate registration process and also capacity assessment process.

When the yarn in question can fetch such a high price, would it not be better to facilitate its exports rather than create hurdles. By the same token, combed fine count yarns can also be sold at \$ 3.5 per kg, yet the export of such yarns has been restricted.—PR

APMTA wants minimum export price fixed for towels

By our correspondent ^{2/3}

KARACHI: All Pakistan Textile Mills Association (APTMA) has demanded to set up minimum export price for towels, as its export price is below the current export price set for cotton yarn.

As per SRO (I)/2010 dated 26th February 2010 the minimum export price for value-added yarns, which can be exported without any quota restriction has been placed at \$3.5 per kg.

Whereas on the other hand, the average export price of the towel sector as reported on the FBS website for months of October, November, December and January is \$3 per kg, but these items are considered value additions and can be exported without any quantity restriction as well as are entitled to other benefits such as export refinance.

M Yasin Siddik, Chairman of APTMA (SB Region) asked on Monday why such unnecessary restriction and conditions were being imposed on the spinning sector. He said even though the minimum export price of \$3.5 per kg has been imposed, yarn producing units were still required to go through a separate registration process and also capacity assessment process.

Siddik said the price of \$3.5 per kg fixed by the textile ministry was a hard target to achieve for most qualities of yarn. He demanded that the minimum export price should be brought down to \$2.7 per kg for it to become realistic.

He said it was the demand of APTMA that the minimum export price for all categories of textile products should be enforced to end this discrimination.
