

SUMMARY OF ITC REPORT ON HS CODE 630260

This document provides a comprehensive analysis of global trade under HS Code 630260, highlighting key trends, players, and market dynamics.

Executive Summary

- The report covers global trade activities from January 2024 to April 2025 under HS Code 630260.
- Peak trade value reached \$9.06 billion in January 2025, indicating significant market events.
- India was the leading exporter with an export value of \$10.39 billion.

A sharp decline in trade activities was noted by April 2025, with values dropping to \$0.0. The United States emerged as the top importer, showcasing its influence in the global market.

Key Findings

- Shipping volumes increased until August 2024, followed by a drastic reduction by April 2025.
- Weight trends peaked in March 2024 at 30.39 million kg.
- Buyer-supplier dynamics peaked in May 2024 with 5826 buyers and 3173 suppliers engaged.
- Major ports like Mundra and Savannah handled immense trade volumes.
- Economic implications suggest robust sectors in exporting countries and strategic import activities by leading economies.

Strategic Recommendations

- Exporters should diversify destinations to reduce dependency on single markets and invest in supply chain resilience.
- Importers should strengthen supplier relationships and explore alternative sourcing strategies to mitigate risks.
- Policymakers should develop trade diversification policies and facilitate trade agreements to enhance competitive advantages.
- Investors should consider strategic investments in technology-driven supply chain solutions and monitor global economic indicators.

Global Market Overview

- The analysis includes trade data from 40 top trading countries, representing 80% of global trade.
- The report focuses exclusively on HS Code 630260, covering toilet and kitchen linen made from terry fabrics.
- The study period captures the latest available data reflecting current market trends and trade flows.

Top Exporting Countries

- India led with an export value of \$10.39 billion, followed by Pakistan (\$1.39 billion) and Argentina (\$916.73 million).
- Asian countries like Vietnam and China also featured prominently among the top exporters.
- The data indicates robust participation from Asian countries in the global trade landscape.

Top Importing Countries

- The report highlights the top 25 importing countries by USD value, emphasizing their roles in the global market.
- The United States is noted for its substantial import activities, reflecting its buying power.

Top Ports of Origin

- Mundra port in India emerged as the leading port of origin with a trade value of \$2.57 billion.
- New Tuticorin also showed significant trade value, underscoring India's pivotal role in international commerce.

Top Ports of Delivery

- Savannah, Georgia, leads in value with \$1.37 billion, followed by Norfolk, Virginia, and New York/Newark Area.
- European ports like Rotterdam and Le Havre also show strong presence, indicating their central role in global maritime trade.

Top Global Suppliers

- Indian suppliers dominate the market, with WELSPUN GLOBAL BRANDS LIMITED leading in USD value.
- The report highlights the concentration of high-value exports from a few suppliers, impacting economic dynamics.

Top Global Buyers

- The analysis reveals significant concentration of trade activity within North America, particularly the United States.
- Diverse industries are represented among top buyers, indicating varied strategies in navigating the global market.

Economic Implications

- The purchasing activities of top buyers significantly influence trade balances and economic growth in both exporting and importing countries.
- The report underscores the importance of diversifying supply sources to mitigate risks and ensure economic stability.
